Black	5.5	59.7	34.8	2.4	-	-	2.5

Spectrum 4060 is a unique sunscreening fabric that combines high-performance with outstanding eco credentials, and looks great too.

PVC-free and made from 100% recycled PET bottles, this fabric scores highly on sustainability. With an aluminium reflective coating on the back, you get extremely effective control of solar glare and heat gain. The 3% openness of the weave gives you all of these performance benefits whilst maintaining a good view to outside.

Fire retardant to international standards and durable in construction, Spectrum 4060 really is the shading fabric that gives you everything.

THICKNESS	0.60mm
WEIGHT	215g/m ²
COMPOSITION	100% recycled PET
WIDTHS	2.4m
FIRE RETARDANCY	M1
CARE INSTRUCTIONS	Clean gently by wiping with soapy water and a sponge
