Duette[®] Shades

Filtering light and insulating your home all year round

3383 Architella®

3383

New 64 mm

Extra wide pleats for large windows

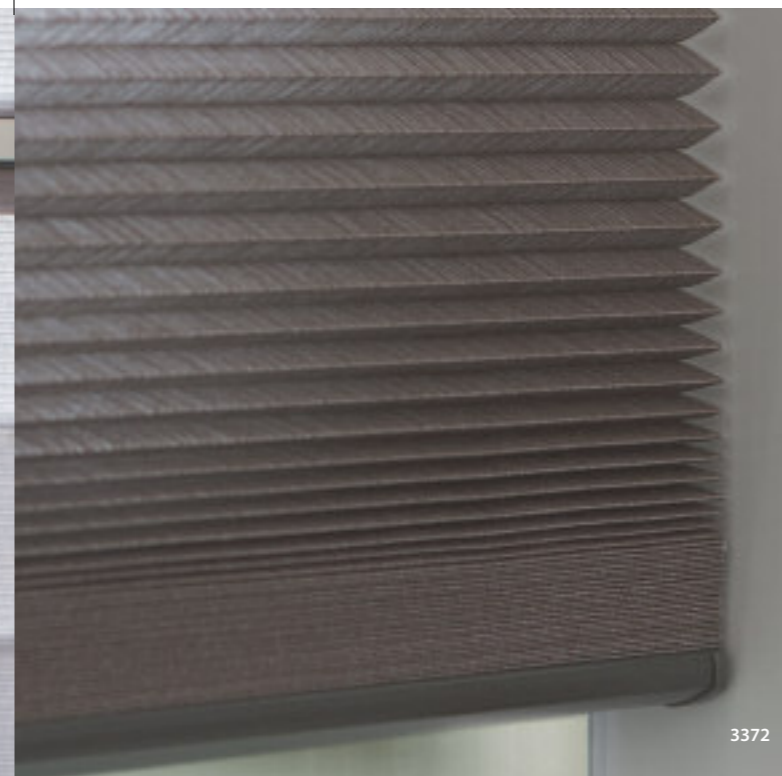

The Duette® Shades collection has been expanded with an extra wide pleat of 64 mm. It is the perfect supplement to the existing widths of 25 mm and 32 mm. The 64 mm Duette® pleat is especially suitable for large windows and is available in the Fixé and Architella® special cell-in-cell constructions. As light enters the room, it is filtered four times to become beautifully diffuse. Every accent in the room becomes softer. Furthermore, Duette® Architella® colour is minimally blurred by sunlight. All Architella® colours are also available in Black Out.

Small to medium-sized windows: Duette® 25 mm

The Duette® Shades with 25 mm pleat width look refined and elegant on small and medium-sized windows. Extremely suitable for mounting close to the glass. These Duette® Shades can even be mounted on sloping glazing beads of at least 8 mm deep.

Medium-sized to large windows: Duette® 32 mm

For a robust look for medium-sized and large windows, there are 32 mm wide Duette® Shades. Suitable for mounting on the window frame, placed in front of any handles or window stays.

An *energy saving* choice

Duette® Shades are the perfect solution for better managing the indoor climate, thereby saving money on energy costs. The air layer in the cell works like an insulating blanket. The 3 air layers in Architella® result in an even higher insulation value. This characteristic is perfectly suited to current environmental awareness. Beautifully diffuse light enters the room through the honeycomb shades providing a unique combination: energy saving window coverings that add atmosphere to the home at the same time.

Practical *atmosphere makers*

Duette® Shades are available in a wide assortment of beautiful fabrics, rich structures and in three transparencies. This makes precise light control and privacy possible. They give a beautiful pleat pattern to windows of all shapes and sizes. The large range of colours allow you to create the desired atmosphere for your living room, kitchen or bedroom. Duette® Shades do not have any visible drilling holes for the pull cords, providing a beautiful uniform appearance. They can be operated manually or motorised. For example LiteRise for 64 mm Duette®: cordless and easy to operate by pulling the bottom rail.

Window shape

Duette® Shades are soft, durable and designed to cover almost any window shape, from vertical windows (0°), tilted windows (to 15°) and ceiling and conservatory windows (to 90°). Duette® Shades also offer the ideal solution for unique positions like a dormer window, glass wall or conservatory roof blind.

UV protection

Duette® Shades protect you, your furniture, wooden floors and valuable objects against damaging ultraviolet radiation.

Insulation

The insulating properties of Duette® Shades make them perfectly suitable for use in conservatories. The air layer in the cell works like an insulating blanket and keeps out the summer heat and the winter cold much better than comparable single layer fabrics. The double layer structure of Duette® Shades is energy-conserving, therefore money-saving, and that makes them good for the environment!

Privacy

Duette® shades also offer privacy. The desired position of the shades and level the amount of light can be easily controlled.

Choose Luxaflex® Window Styling for a unique quality product with a five-year guarantee. Luxaflex® Window Styling offer a wide range of attractive window coverings with an extensive choice of materials, colours, designs, finishes and control options.
