

Timberlux™ Specifications

Oxford

Classic, dignified good looks. Colour co-ordinating cords, ladder strings and headrail with sculptured valance. Slats are available in dramatic 50mm and 45mm, elegant 35mm or contemporary 25mm widths.

Shutter Style

The ultimate in privacy. Slats are manufactured without rout holes. The bevelled slat offers complete closure. See price list for specification.

Balmoral

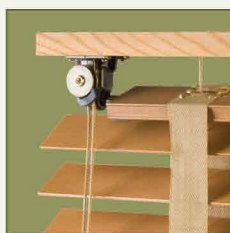

Traditional style blinds with the choice of either 38mm or 25mm tapes for 50mm slats and 25mm tapes for 35mm slat. For 25mm slats 19mm wide tapes are available. A stylish sculptured valance adds the finishing touch.

Wood Characteristics

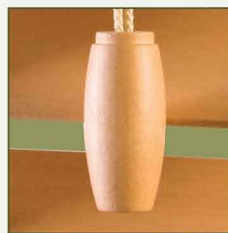

Timberlux™ wood blinds are a natural product thus variations in shade, graining as well as warping may occur.

Due to the nature of wood it is impossible to obtain the same level of closure as when manufacturing aluminium venetians as aluminium can be formed unlike wood which is a totally natural product.

Windsor

Elegance from a bygone age. Hand-crafted solid wood headrail and tilt bar. Bold wide tapes with 50mm wide slats. Authentic reproduction cast features. Classic craftsmanship and style.

Finishing Touch

Matching wood acorns come as standard with all Timberlux blinds. Brass, chrome and gunmetal acorns are available on request at time of ordering.
