

Blind[®]
SCREEN

**Perfect for
all seasons**

Comfort and Style for Seasonal Living

Blind Screen® products are the quiet heroes of home design - enhancing comfort, privacy and design in the home throughout the year. They go beyond basic window coverings to offer exceptional light control and energy savings, lowering household energy bills through improved thermal

efficiency. The discreet, slimline design integrates seamlessly with windows and doors and is available in Single, Dual, and Double Track options to suit every type of space. Perfect for all seasons Blind Screen® systems offer tailored solutions for both residential and commercial projects.

Benefits You'll Enjoy All Year Round

Energy Efficient: Advanced thermal honeycomb fabrics reduce heat loss by up to 49% in winter and prevent overheating in summer, to help the home stay comfortable year-round with better climate control.

Create the Right Ambience: Choose from four fabric styles for total flexibility. Scene Set™ blackout for sleep, Light Seal™ dimout for soft daylight, Sheer Intimacy™ for privacy, or Breeze In™ fly screen for fresh air.

Enhanced Blackout Performance: Achieve full blackout any time night or day, Blind Screen® systems block out unwanted light and reduce glare, making bedrooms, nurseries, and media rooms more comfortable year-round.

Breathable Protection: Access fresh air insect-free with sheer and flyscreen options. Enjoy privacy without losing natural light, whilst helping to keep pets safe and comfortable indoors.

Practical and Durable: Durable, smooth-operating systems are built for long-lasting performance. Blind Screen® window coverings are easy to clean and designed to withstand the rigors of everyday life.

Up To **81%** Heat Retention

Thermal Energy Savings

9% - 15% Saving on Heating Bills

UNIVERSITY OF DERBY

UNIVERSITY OF SALFORD MANCHESTER

“ Class Leading Thermal Window Blind ”

Professor Will Swan
Director of Energy House Labs
University of Salford

“ Our previous research into the area of blinds and curtains, make a valuable contribution towards energy savings and reducing carbon emissions for householders. Blind Screen® has recognised this opportunity and through working with the University of Salford and making use of our unique testing facilities, the team have developed a class leading thermal window blind. We are very pleased with this successful outcome that will help cut energy bills and support the future growth of the company. ”

Systems Perfect for All Seasons
