

A solution to conceal blinds in any window

Blindspace® boxes and covers have been developed to conceal blinds in any type of window including gables and skylights. Back boxes are installed during construction, while electric blinds, side channels, tracks and guide wires, can be installed at a later date.

The Blindspace® hinge cover is easy to install and requires no screws. The patented cover solution also enables fully closed covers as a way to future-proof glazing areas for future installation of motorised blinds.

The cover can be provided in any RAL colour or with primer for site painting to match the ceiling. Architects and interior designers have also faced covers with other material such as stainless steel and timber.

Features

- ✓ Minimalistic design with fully concealed boxes and blinds
- ✓ Reduces time to provide for and install concealed blinds
- ✓ Head box conceals the hem bar when the blind is retracted
- ✓ Side boxes can be used to conceal guide tracks and wires
- ✓ Hem bar box can be used to only have fabric visible
